

Multi Head Combination Weigh Filler with FFS Machine

PS 701 multihead weighers are high-performance machines for precision weighing and counting. The machines, known as multihead weighers or combination weighers, weigh chunky products such as dried fruits, confectionery and frozen products just as effectively as extremely breakable products such as biscuits or salted sticks. Snacks, confectionery, granules, frozen products as well as metal or plastic parts. The decisive feature is that the format parts can be exchanged in no time at all so that stick-shaped products can also be weighed - from salted sticks through chocolate-coated sticks to technical products, PP 701 pack products to your specifications. All parts of our machines that come in contact with products are of course made from hygienic stainless steel. Intelligent design and protective covers allow the machines to be used in wet areas.

PS 701
