Involute Institute of Technical Training (IITT)

Smart Training Solutions. Improved Operational Efficiencies.
The manufacturing sector is expanding and diversifying massively. However, creating of a pool of adequately skilled technicians to match the growth, remains a major constraint for the industry. To address this challenge, IITT proposes a unique skill development initiative for manufacturing industry.

Established in 2011, IITT is a training institute dedicated to make technical training relevant to industry needs. IITT aims at creating "Work ready" technicians for manufacturing industry.

IITT's training program is focused on providing targeted training modules that enhance the hard skills of industrial work force and thereby increasing their productivity and employability. IITT aims at training 10,10+2, ITI & Diploma candidates who are above 18 years and make them factory ready in 45 days.

IITT Training Methodology

IITT specializes in developing the full potential of one of the most valuable assets that any organization possesses - Ready to deploy skilled manpower.

About Involute (Parent Company)

INVOLUTE AUTOMATION (P) LTD has been in the business of providing Automation Solutions for manufacturing industry for the last Four decades. Involute Automation, an ISO 9001: 2008 certified company, specializes in design, manufacture and integration of automation equipment Over the years, Involute Automation's strength has been in developing fully indigenous and customized automation solutions for Foundry, Forging, Solar, Pharmaceutical, and Defence industries. Involute Automation is a certified system integrator for M/s ABB Robotics and Cognex vision Systems. In the year 2011, Involute has started IITT to serve the training needs of Manufacturing Industry.

- ✦ Maintain a healthy, safe and secure working environment

Programs

Induction

Induction Training helps integrate new employees as a productive part of the Client's business

Candidates sourced by either the client or Involute, will be trained at IITT.

Candidates will be assessed and certified

Skill Upgrade

IITT's skill upgrade programs help companies enhance the productivity of their existing employees.

As a part of skill upgrade training, IITT faculty train the employees nominated by the customer.

Training programs are customized to suit client requirements.

Partnering Organizations

IITT is the first of its kind organization established with an aim to create employable manpower through skill development. The institute has partnered with National Skill Development Corporation (NSDC) and Ministry of Rural Development (MORD) to impart technical training. IITT is working jointly with UNIDO for continuous improvement to the course structure and teaching methodologies.

Customer Benefits

- Trained Shop floor employees
- Increase in productivity
- Overall equipment efficiency
- Consistent quality products
- Better employee retention rate
- Better employee- employer relations
